OBJECTIVE

Computer Science undergraduate with a CGPA of 9.82 and hands-on experience in AI, Machine Learning, NLP, and Data Analytics. Seeking AI/ML and Data Science internship opportunities to apply technical skills in solving real-world problems.

SKILLS SUMMARY

Languages:	Python, Java, C, SQL
Frameworks & Technologies:	Scikit-learn, Pandas, NumPy, Machine Learning, NLP, Data Analysis
Tools:	Streamlit, Git, GitHub, Jupyter Notebook, VS Code, MySQL, Data Visualization
Platforms:	Windows, Linux, Google Cloud Platform
Soft Skills:	Problem Solving, Communication, Teamwork, Writing, Time Management

EDUCATION

B.Tech - CSE , The Apollo University	2023-2027
CGPA - 9.82	

Intermediate - MPC , Sri Chaitanya Junior College	2021 - 2023
Percentage - 95.1	

INTERNSHIP EXPERIENCE

Virtual Data Analytics Intern – Deloitte (Forage)	Dec 2025
--	----------

- Completed real-world data analytics simulation involving structured datasets.
- Performed data cleaning, validation, and anomaly detection.
- Generated structured business insights through analytical reporting.

CDHPM Internship – AI Healthcare Project	Jun 2025
---	----------

- Developed an AI-based wearable system for early stroke detection using machine learning.
- Built an end-to-end ML pipeline including data preprocessing, feature engineering, and model training.
- Trained and evaluated classification models for stroke risk prediction using healthcare datasets.

AI Intern – YHills	Apr 2024 – May 2024
---------------------------	---------------------

- Built supervised machine learning models using Scikit-learn.
- Performed data preprocessing and feature engineering for model optimization.
- Evaluated models using accuracy, precision, recall, and F1-score metrics.

PROJECTS

AI Resume Parser & ATS Analyzer | Python, Streamlit, Scikit-learn, NLP, Sentence Transformers

- Developed an AI-powered resume screening system using NLP and Sentence Transformers.
- Implemented ATS scoring, skill extraction, and job matching engine.
- Deployed interactive Streamlit web app for real-time resume evaluation.

TruthLens AI – Fake News Detection System | Python, NLP, Scikit-learn, Streamlit

- Developed an NLP-based text classification system for fake news detection using TF-IDF and Logistic Regression, achieving 92% classification accuracy on test datasets.
- Built and trained an interactive Streamlit web application for real-time fake news prediction, incorporating text preprocessing, feature extraction, and model inference.

CERTIFICATIONS

- NPTEL – Data Science for Engineers (IIT Madras) – Elite
- NPTEL – Machine Learning (IIT Kharagpur) – Elite
- Anthropic – AI Fluency: Framework & Foundations
- Google Cloud Skills Boost – Cloud Computing Fundamentals
