OBJECTIVE

A dedicated Computer Science Engineering student at The Apollo University with strong analytical skills and experience in AI and data analytics projects, seeking an internship opportunity to apply technical knowledge and contribute to innovative solutions.

TECHNICAL SKILLS

Programming Languages	C, Python, Java
Databases	MySQL
Tools	VS Code
Core Concepts	Machine Learning, Data Preprocessing, NLP, Predictive Modeling

EDUCATION

B.Tech - CSE , The Apollo University CGPA - 9.81	2023-2027
---	-----------

Intermediate - MPC , Sri Chaitanya Junior College Percentage - 95.1	2021 - 2023
--	-------------

INTERNSHIP EXPERIENCE

CDHPM Internship – Health Management (Project-Based)	Jun 2025
---	-----------------

Project - AI-Driven Wearable System for Early Stroke Detection During Sleep

- Worked on the conceptual design of an AI-driven wearable system for analyzing multiple health parameters for early stroke detection during sleep.
- Executed data cleaning and preprocessing on health datasets to ensure high data quality for an AI-driven wearable system targeting early stroke detection.
- Contributed to planning preventive healthcare approaches centered on early diagnosis and continuous monitoring.

Virtual Internship - Deloitte(Forage)	Dec 2025
--	-----------------

Data Analytics Job Simulation

- Completed real-world tasks in data analysis and forensic technology.
- Analyzed datasets to extract insights and presented findings using structured reporting techniques.

AI Intern - YHills	Apr 2024 - May 2024
---------------------------	----------------------------

- Learned and implemented core Artificial Intelligence and Machine Learning concepts.
- Worked on mini-projects involving supervised learning and predictive modeling.
- Gained hands-on experience in data handling and model evaluation techniques.

PROJECTS

Fake News Detection System

- Developed a Machine Learning-based Fake News Detection system using Python and basic NLP techniques.
- Implemented data preprocessing, feature extraction, and classification models.
- Improved understanding of real-world AI applications in misinformation detection.

ACHIEVEMENTS & CERTIFICATES

- **Google Cloud Boost Skills** – Multiple Cloud Learning Badges
- **Cloud Computing Bootcamp – YHills**
 - Cloud fundamentals and deployment basics
- **System Design** – How to Approach MAANG
- Hands-on Workshop on **Software Testing Tools** – Real-time testing practices.
